## Maths Problem of the Week — Decimals and Percentages

Make the numbers with place value counters and write down the value of the underlined digit.

2.<u>4</u>5

3.0<u>4</u>

4.44

43.34

0.76 = 0.7 + 0.06 = 7 tenths and 6 hundredths. Fill in the missing numbers.

0.83 = \_\_\_\_\_ + 0.03 = \_\_\_\_\_ and 3 hundredths.

 $0.83 = 0.7 + ___ = 7 \text{ tenths and } ___$ 

How many other ways can you partition 0.83?

## **PARENTS!**

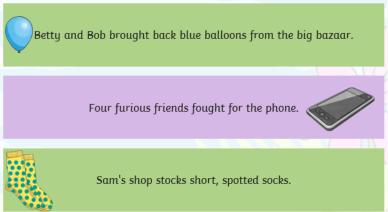

Could you ensure that you read with your child at least once a week? As the children enter Year 6, they will be expected to provide inference and explain answers in order to show understanding of the texts that they are reading — the class have responded fantastically this year so we want to make this transition as seamless as possible!

Thank you!

## <u>English – Identifying Alliteration</u>

Which letter is being repeated in the following sentences?

Have a lovely weekend with your children!

Mr Daly Year 5 Teacher
